- The estimated battery life are tested under room temperature conditions of 25 degrees Celsius.
- Battery life may vary based on environmental conditions, temperature, and many other factors; actual results will vary.
- The estimated battery life shown on tables are tested with TOSHIBA AA Alkaline batteries (LR6GCNN). Different batteries provide different lengths of life and power output, depending on the type and amount of chemicals used to compose them.
- Rechargeable batteries are not recommended as the lower voltage they produce may vary performance.
